- ▢ Unity

## LANGUAGES SPOKEN

- 🗣 Romanian (Native)
- 🗣 English (Native)
- 🗣 German (Conversational)
- 🗣 Spanish - Castilian (Conversational)

4

eager **co-founders** kicked things off in late 2023

6

**active clients** on-boarded and projects signed

7

projects **completed** successfully

3

**on-going** projects that are nearing completion

# DN DEV IN NUMBERS

## ACADEMIC BACKGROUND

Collectively, we have accumulated:

- 🎓 **16 years** of undergraduate studies
- 🎓 **7 years** of postgraduate studies (master degrees)

Noteworthy results were achieved during these years, with fields of study including:

- 🎓 Computer Science & Engineering
- 🎓 Game Development
- 🎓 Project Management, Finance & Risk
- 🎓 Psychology
- 🎓 Finance & Banking
- 🎓 Business Management - International Business

## PROFESSIONAL BACKGROUND

Over the course of our careers, we have amassed **45+ years** of collective professional experience, within various industries, both public and private.

- 💻 Software Development & Management
- 💻 Game Development
- 💻 Project Management (Software)
- 💻 Financial Management & Reporting
- 💻 Supply Chain Management
- 💻 Retail Management
- 💻 Sales

## PAST EXPERIENCE

The experiences we've had the opportunity to go through have helped shape who we are today. Some of these experiences include:

- 🏢 Worked - as part of a London startup team - on multiple **multi-million dollar software development projects** for **multi-billion dollar companies** from the US, UK and EU
- 🏢 Actively contributed to all stages of the product life cycle from ideation to implementation, testing, delivery and support
- 🏢 Managed systems spanning across multiple code bases and platforms
- 🏢 Managed teams and project teams of up to 15 people
- 🏢 Successfully integrated custom-built reporting tools
- 🏢 Helped manage the allocation of multi-million £ to healthcare projects within the UK

## WHAT WE CAN HELP WITH

- 💡 Windows and Mac applications development
- 💡 Windows and Linux server administration
- 💡 Server to server integrations
- 💡 Web and full stack development
- 💡 Content distribution
- 💡 Database management

## OUR PROJECT MANAGEMENT PARTICULARITIES

- We find comfort in thorough organisation, as do our clients.
- 🔍 For that reason, we like to keep a common overview of our project with our clients, using a client portal
  - 🔍 We realise that often times 'one size fits all' does not work, which is why we have a base layer upon which we build and customise to ensure the best outcome possible
  - 🔍 We build the aforementioned base layer by asking a lot of questions up front and clarifying from the get go as many unknowns as possible
  - 🔍 Quite often, over-communication is preferred and more often than not is our preferred approach
  - 🔍 Off-boarding is just as important as on-boarding and can help prevent and reduce potential issues
